

High anti-vibration and higher reliability.
Long storage life. New technology:
Technology of manganese ring secondary pressing.
High technology negative anode formula
offers mercury-free and high anti-vibration.
Improve seal structure of alkaline manganese
assures its safety and reliability.
High-density separating paper improves high drain
discharge performance.
Internal carbon-coating technology decreases
the inner resistance of the battery.

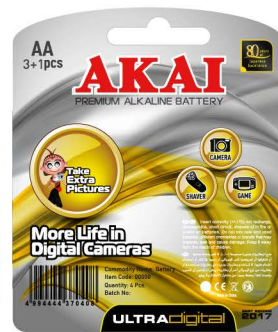

Type : AA/ AAA
Volt : 1.5v
Chemistry : Alkaline
Pack : 2 / 4
Application : Digital Camera, Shavers etc.

Type : 9v
Volt : 9v
Chemistry : Alkaline
Pack : 1
Application : Toys, Industrial Tools, Smoke Alarms etc.

Ready 2 USE Rechargeable Battery

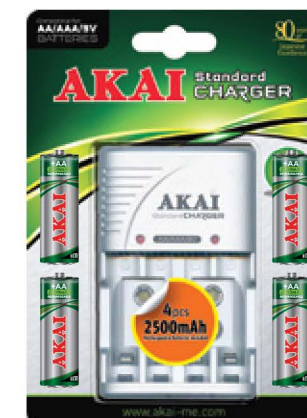

Combined performance of rechargeable battery and primary battery. Compared with other Ni-MH battery, ready-to-use battery has many advantages such as lower self discharge, longer storage time, longer service life etc. Especially the superior performance of capacity recovery even the battery voltage is below 1.0V, and 85% charge retention even after one year storage. It is the best choice to replace primary batteries. This series battery charged rapidly at high current with dedicated charger. Charge retention can reach up to more than 80% 90% with 30-15mins charging. It is the best choice for travel. Possible to use 1000 times. Reusable: ready to use from the pack. Recyclable: long shelf life. High -energy: Can be used everywhere.

Type : AA/ AAA
 Volt : 1.5v
 Chemistry : Ni-MH Rechargeable
 Capacity : 600mAh – 1200mAh
 Pack : 2
 Application : Digital Camera, MP3 / CD Players

Battery CHARGER

Standard CHARGER

AA/AAA/9V

This charger can charge 4 /2 pcs AA/AAA and 2 pcs of 6F9(22V) Ni-MH/Ni-Cd rechargeable batteries, Voltage control Charge for 2 pcs of batteries in series. it can not charge single battery. The constant current and voltage keep the battery longer using life.

Models: CR024B (4AA+AAAx2500mAh)
 CR024A (4AA+AAAx950mAh)

Input: 240-100V AC 60/50Hz
 Output: 2.4V DC 400mA
 9V DC 20mA
 AA 950 mAh to AA 2500mAh
 AAA 650mAh to AAA 1200mAh

Compact CHARGER

This charger can charge 2-1 pcs AA/AAA Ni-MH/Ni-Cd rechargeable batteries. This charger can not charge dry battery. The two LEDs show the charging process of its corresponding charging slot, but will not turn off when the battery full charged.

Models: CR026B (2AA+AAAx2500mAh)
 CR026A (2AA+AAAx950mAh)

Input: 110V or 220 V AC 60/50Hz
 Output: 1.2V DC 240mA
 AA 950 mAh to AA 2500mAh
 AAA 650mAh to AAA 1200mAh

Rechargeable ULTIMATE Rechargeable Battery

Rechargeable batteries can be charged and discharged freely. High capacity: High energy density and double the capacity of Ni - Cd batteries in similar size, and more suitable for sophisticated high drain application. Long Usage Life: Under different usage condition AKAI Ni-MH battery can reach 1000-500 charge/discharge cycles. High rate discharge characteristics. Environmental friendly: No mercury, cadmium or lead are added. No memory effect, need not to discharge before use. Low internal resistance.

Type : AA/ AAA
 Volt : 1.5v
 Chemistry : Ni-MH Rechargeable
 Capacity : 950mAh – 2500mAh
 Pack : 2
 Application : Digital Camera Toys, Remote, Etc.

Type : 9v
 Volt : 9v
 Chemistry : Ni-MH Rechargeable
 Capacity : 170mAh – 340mAh
 Pack : 1
 Application : Toys, Industrial Tools, Etc.
